# Transcriptomic Reversal Screen — SSc Skin scRNA-seq

Generated: 2025-09-18 16:08 | Repo: scleroderma-scvi

# **Executive Summary**

- Atlas-level reversal against LINCS L1000 perturbations across annotated cell types.
- Composite ranking emphasizes total reversal, fibroblast/myofibroblast selectivity, and significance.
- Broad cytotoxics deprioritized; MEK/ERK, EGFR axis, and BET families recur across clusters.
- All results are hypothesis-generating not clinical guidance.

# Shortlist (summary)
